Dungeon Name Generator

This is a free web enhancement for *Dungeon Bash* (DB), to add a little more flavor to your dungeon crawls. That shouldn't stop you using this generator whenever you need it, even when not playing DB - if you need a name for a dungeon for your regular RPG campaign, for instance. To use this name generator, roll once on *Table D1* to determine the name's components (prefix, main, and/or suffix), and then roll once on all tables determined by that result. For example, if you rolled a 12 on *Table D1*, you'd roll once on *Table D2* (result: 34), once on *Table D3* (result: 03), and once on *Table D4* (result: 79). The dungeon's name therefore would be "Eternal Catacomb of the Wyrn".
